

Environmental Policy Vision Alignment Partners

Vision Alignment Partners confirms its commitment to operating in line with best practice and current legislation in the field of environmental impact. Whilst our impact is limited due to our status as a network based consultancy with no owned premises we recognise a responsibility to contribute to good practice.

Our consultants and our business practices will act where possible to minimise their negative impact on the environment and will take account of environmental issues in formulating solutions for our clients, in accordance with an EFQM view of the organisation.

We will particularly:

- Comply with our client's or partners stated environmental policies – where appropriate to our activities.
- Operate on a virtual team or least travel basis where consistent with best delivery.
- Act to minimise waste, particularly paper.
- Encourage and support recycling.
- Encourage use of energy efficient equipment and practices.
- Reduce the use of all raw materials, energy and supplies.
- Raise awareness in our consultants.
- Continuously seek to improve environmental performance.
- Review our practices and commitments annually.
